Asunto: Third Year PhD students' presentations

Dear all,

The third year PhD students' presentations are scheduled for July 14.

As you know, the objective of these presentations is to evaluate the research progress accomplished by students during their third year. The time allocated to each presentation is 45 minutes. Students should also distribute a draft of their research in progress. The students' continuation in the PhD program is subject to adequate performance in these presentations and written output. All faculty and PhD students are welcome to attend.

The main advisor of each student should prepare a short report and send it to Diego Puga by July 13, on the student's research progress, that will be discussed in a meeting after the presentation.

Presentations are scheduled as follows:
