EVALUATION

Evaluation system

At the regular exam session, which lasts 90 minutes, the final grade of a student will be determined by two main components: the online activities and the final examination.

Online activities

20% of final marks. Exercises of the online modules will sum up to 20% of final marks, taking into account attitude, participation, and punctuality delivering the exercises on time. In order to obtain this 20% the student must achieve correctly 100% of each of 10 activities out of 10. Any score under 10 totally correct activities will qualify for its value (i.e. 8 out of 10 correct activities will sum 16% out of the possible 20%).

The corrections for the online activities carried out by various instructors are scored according to a Gaussian curve grading scale applicable to each group, ensuring that the distribution of grades remains consistent across all groups.

Final exam

80% of final marks. Final exam is held at ICEX-CECO. It takes place in November. Maximum grading:10 points.

• The exam has 40 multiple choice questions. Correctly answered questions will add up 0.25 points each. 0.125 points will be deducted from each incorrect answer. The answers will be based on the following materials:

- The explanations and documents are given in class and the online material.
- A personal effort of reflection and own criteria of the student

• Grading will be done on a Gaussian bell styled grading curve (bell curving marking).

-Online Activities 20%

-Final Exam 80%

-Total Grade 100%

In the 2nd and subsequent calls, the grading will depend on the tests (multiple-choice written exams, essay-type exams, assignments, oral exams, etc.) which will be determined by the instructors and communicated to the students in advance.
